

# Devarth V. Sambare

Unreal Engine developer

devarthsambare123@gmail.com +91-9082831419 Vitawa - MH, India

linkedin.com/in/devarth-sambare-2b8049218

## Objective

---

Unreal Engine developer focused on building engaging experiences that explore new creative possibilities within the industry.

## Experience

---

### Agovthi

09/2024 - Present

Unreal Engine Generalist

- **Gameplay Design & Optimization:** Focused on designing and optimizing gameplay mechanics, UI, and overall game feel to create polished and immersive experiences, leading to a 25% increase in user engagement during testing sessions.
- **Scout Guide Game (UP Government):** Developed a VR game for children attending the 19th National Jamboree, commissioned by the UP Government. The experience was enjoyed by over 3,000 children, delivering interactive and educational gameplay in an immersive virtual environment.
- **Krushvi VR - Educational Game (UP Government):** Built an educational VR game for the UP Government targeting the farming community. Designed to train and inform farmers through immersive simulations covering modern agricultural practices and techniques.
- **Cycle Game (Apollo Hospital):** Developed a competitive 1v1 cycling game using Unreal Engine for Apollo Hospital through Agovthi. Designed engaging real-time gameplay mechanics with a focus on health and fitness motivation.
- **Primitive Chaos - Upcoming Multiplayer Game:** Contributing to Agovthi's in-house multiplayer title by setting up the Steam Online Subsystem, implementing core multiplayer architecture, and engineering replicated gameplay mechanics with precision using Unreal Engine's replication framework.

### Unicorniz innovation

Advanced VR Developer Intern

04/2024 - 08/2024

- Engineered four virtual reality enhancements within Unreal Engine and Blender (smooth locomotion, teleportation, haptic feedback, guided interaction) that decreased user-reported motion sickness by 60%.
- Upgraded the Cellular Jail VR project by integrating AI-driven NPCs, interactive mechanics, and narrative elements. Provided streamlined PCVR builds across multiple projects, improving frame rate by 30 FPS and ensuring smooth deployment.

VR Developer Intern

03/2023 - 05/2023

- Designed and upgraded immersive VR experiences like Barren Island VR and Cellular Jail VR using Unreal Engine and Blender. Incorporated real-world data, AI-driven NPCs, interactive mechanics, and custom locomotion. Delivered streamlined PCVR builds with advanced rendering for high performance and three cross-platform deployments, contributing to a 70% increase in user session duration during internal testing.

## Education

---

### B.Sc. - Computer Science

University of Mumbai (Pursuing)

First Year CGPA 9.09

## Project(s)

---

## Barren Island VR

(Unicorniz Innovation)

- Created a realistic VR environment using Unreal Engine, Blender, and Gaia.
- Constructed interactive VR environment featuring AI-driven NPCs utilizing behavior trees and pathfinding, yielding a 20% increase in user engagement based on NPC interaction duration.
- Optimized and packaged for standalone and PCVR.

## Cellular Jail VR

(Unicorniz Innovation)

- Fine-tuned VR project with AI-driven conversations and interactive storytelling.
- Enhanced for standalone and PC VR platforms.

## Dicino

(Mobile Puzzle game)

- Developed a dice puzzle game for a game jam, designing mechanics, models, and UI.
- Completed as a solo project, packaged for play.

## Seaside Wedding VR

(Freelance)

- Recreated a couple's wedding in a serene island VR environment.
- Used Unreal Engine, Blender, and water/sky plugins to design the scene.

## JBM University VR Project

- Converted a SketchUp university design into an interactive VR experience.
- Presented at the UP Trade Expo 2023 to the President and Prime Minister.

## Skills

---

|                         |                                                                 |
|-------------------------|-----------------------------------------------------------------|
| Game Development        | Game Design (level design, storytelling, character development) |
| Scripting               | VR/AR Development                                               |
| 3D Modeling / Animation | Testing, Debugging, Play Testing, QA                            |
| UI/UX Design            | Methodologies                                                   |
| Problem Solving         | Worldbuilding                                                   |
