Unreal Engine developer with **5 shipped projects deployed to real users** — children at a national event, hospital patients, museum visitors, and government officials. Specialized in multiplayer systems (Steam OSS), VR experiences, and polished, physics-driven gameplay in UE5 with Blueprint + C++.

## EXPERIENCE

### Agovthi — Unreal Engine Generalist

09/2024 – Present

- **Primitive Chaos (in development)**: core contributor on Agovthi's in-house multiplayer title — Steam Online Subsystem setup, multiplayer architecture, and server-authoritative replicated gameplay on UE5's replication framework.
- **Scout Guide VR (UP Government)**: VR game for the 19th National Jamboree, played by **3,000+ children** — interactive, educational gameplay in an immersive environment.
- **Krusha VR (UP Government)**: educational VR simulations training farmers in modern agricultural practices.
- **Cycle Game (Apollo Hospital)**: competitive 1v1 cycling game with real-time mechanics focused on health and fitness motivation.
- Designed and optimized gameplay mechanics, UI, and game feel across titles — **+25% user engagement** in testing sessions.

### Unicorniz Innovation — Advanced VR Developer Intern

04/2024 – 08/2024

- Engineered four VR interaction systems in UE + Blender (smooth locomotion, teleportation, haptic feedback, guided interaction) — **-60% user-reported motion sickness**.
- Upgraded Cellular Jail VR with AI-driven NPCs, interactive mechanics, and narrative elements; streamlined PCVR builds across projects, **+30 FPS**.

### Unicorniz Innovation — VR Developer Intern

03/2023 – 05/2023

- Built and upgraded immersive VR experiences (Barren Island VR, Cellular Jail VR) with real-world data, AI-driven NPCs, and custom locomotion.
- Delivered optimized PCVR builds and three cross-platform deployments — **+70% user session duration** in internal testing.

## PROJECTS

Full showcase with videos & breakdowns: [devarth-portfolio.vercel.app](https://devarth-portfolio.vercel.app)

### Primitive Chaos

Agovthi · UE5 · Multiplayer · Steam OSS  
Physics-driven multiplayer game: session flow, core architecture, and replicated gameplay mechanics.

### Cycle Game

Apollo Hospital · UE5  
Competitive 1v1 cycling game promoting health and fitness through real-time gameplay.

### JBM University VR

UP Trade Expo 2023  
SketchUp-to-VR interactive campus, presented to the President and Prime Minister of India.

### Scout Guide VR

UP Government · 19th National Jamboree  
Educational VR game enjoyed by 3,000+ children at a national event.

### Barren Island VR

Unicorniz · UE + Blender + Gaia  
Realistic VR island with AI NPCs (behavior trees, pathfinding) — +20% engagement; standalone + PCVR.

### Seaside Wedding VR

Freelance  
A couple's wedding recreated in a serene island VR environment (water/sky plugins, Blender).

### Krusha VR

UP Government · VR Training  
Agricultural VR simulations teaching modern farming practices to the farming community.

### Cellular Jail VR

Unicorniz · Museum VR  
Historical VR experience with AI-driven conversations and interactive storytelling; standalone + PCVR.

### Dicino

Solo · Game Jam · Mobile  
Dice puzzle game — mechanics, models, and UI built solo; completed and packaged for play.

## SKILLS

**Engine & Code:** Unreal Engine 5, Blueprint + C++, Steam Online Subsystem, EOS, replication & multiplayer architecture

**VR / AR:** PCVR & standalone builds, locomotion systems, haptics, comfort/motion-sickness design

**3D & Design:** Blender (modeling/animation), level design, storytelling, character development, UI/UX, worldbuilding

**Process:** Gameplay optimization, testing/debugging/QA, play testing, cross-platform packaging

## EDUCATION

**B.Sc. Computer Science — University of Mumbai (pursuing)**

First Year CGPA 9.09
